

Norsaic

Norsaic (co-funded by Interreg North Sea Region) aims to improve cooperation and governance in marine spatial planning (MSP) by adapting and advancing crucial MSP elements, establishing innovation capacity and building joint cooperation capacity.

What We Do

1) Adaptation - Planning for the Future

Developing visions and strategies for the adaptation and advancement of crucial MSP elements to generate future proof MSP processes and plans in the North Sea region responding to a changing climate.

2) Innovation Capacity for Governance in MSP

Establishing innovation capacity by bringing together competent MSP authorities, regional/ local representatives, and research institutions to co-design innovative approaches and tools on multi governance levels for multi-use of space, cumulative impacts of maritime activities and land-sea interaction.

3) Cooperation - Building Joint Capacity

Building joint capacity towards long lasting governance, taking up innovation capacity and crucial MSP visions and strategies towards joint learning and mutual knowledge with competent MSP authorities, regional/ local representatives and research institutions.
